

Logitech M235 Teardown

A teardown of the Logitech M235 wireless mouse

Written By: Daniel

INTRODUCTION

A teardown of the Logitech M235 wireless mouse

Step 1 — Logitech M235 Teardown

- Remove the battery and battery cover

Step 2

- Remove the the two screws holding the cover.

i I had two of these mice and one of them had a screw hidden under the CE sticker so make sure you check it out before opening the mouse apart

Step 3

- Use a prying tool to split the mouse case apart.

Step 4

- The case should be easy to open and not require much force.

Step 5

- The PCB is only held by a few clips and can be easily removed.

Step 6

- The top mouse cover can be removed by undoing three white clips holding it on the grey plastic part.

Step 7

● Done!

To reassemble your device, follow these instructions in reverse order.
